

Novel fibre value chains & ecosystem services from sustainable feedstocks

Newsletter #6 | August 2024

Fiber fact

The wood is a material that possesses natural thermal and acoustic insulation properties.

The raw material for the manufacture of particleboard panels consists mainly of industrial roundwood, sawmill by-products such as bark, chips, or shavings, as well as old wood."

95%

Currently, on a global scale, wood represents about 95% of the fibrous raw material used by the pulp industry.

Partner of the month

FCBA and its teams of experts help companies in the forestry, cellulose, construction and furniture industries improve their competitiveness and speed up their ecological and digital transition. It provides companies with the know-how of its teams and the technology of its laboratories. It assists professionals with Research, standardisation, training, testing, certification, and improves the quality of their products.
