*Populus, Salix, Robinia pseudoacacia*

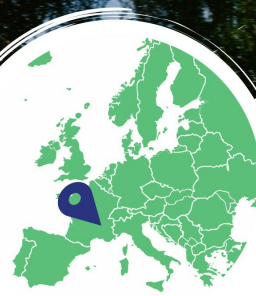

## PONT-DE-CLAIX, FR

[edern.philippot@fcba.fr](mailto:edern.philippot@fcba.fr)

The land of 4 ha, formerly occupied by Becker Industrie (a manufacturer of industrial paints and varnishes), has been a wasteland since the site closed in 2011. In 2019, the public landowner and the town of Pont de Claix joined forces with Envisol to set up Crisolid, a cooperative aimed at promoting the redevelopment of brownfield sites.

The site is currently being used as a full-scale laboratory for the implementation of innovative soil decontamination techniques, with species like poplar, willow and locust establishing themselves naturally on this wasteland.

Within FIBSUN, wood from this site will be used mixed with cement to produce bricks.
